BRIANNA BROCKINGTON

Software Engineer · AWS Certified · B.S. Expected April 2026

Greer, SC · Willing to Relocate · 813-860-6142 · briannab1997@gmail.com · linkedin.com/in/brianna-brockington-1b6a59a9 · github.com/briannab1997

PROFESSIONAL SUMMARY

Results-driven Software Engineering student (B.S. expected April 2026) with 7+ years of cross-functional enterprise experience in compliance-driven healthcare environments. Strong foundation in data structures, algorithms, backend development, REST APIs, and cloud technologies. Holds AWS Certified Cloud Practitioner and CompTIA Network+ certifications. Proven ability to troubleshoot complex systems, document defects, and collaborate cross-functionally. Seeking SWE internship or new grad roles at high-growth tech companies.

TECHNICAL SKILLS

Languages	Java · Python · JavaScript · TypeScript · Kotlin · SQL · C# · C++ · HTML · CSS
CS Concepts	Data Structures (Arrays, Linked Lists, Trees, Hash Maps, Stacks, Queues) · Algorithms (Sorting, Searching, Recursion, Dynamic Programming, Big-O Analysis)
Web & APIs	React 18 · TypeScript · React Native · Expo · Android (MVVM/Room) · Vite · REST APIs · Node.js · OpenAI API · Postman · Chrome DevTools
Cloud & DevOps	AWS (Certified Cloud Practitioner) · Docker · CI/CD Fundamentals · Git · GitHub
Testing & QA	Manual Testing · Test Case Design · Bug Reporting · API Testing · Exploratory Testing
Tools & Process	Jira · Agile/Scrum · System Documentation · Cross-functional Collaboration

CERTIFICATIONS

✔ AWS Certified Cloud Practitioner ✔ CompTIA Network+ ✔ ITIL Foundation – IT Service Management ⏳ Google IT Support Professional (In Progress)

PROJECTS

ShopNova – Full-Stack E-Commerce Platform | github.com/briannab1997/shopnova | briannab1997.github.io/shopnova/

- Built an Amazon-inspired full-stack storefront using React 18, TypeScript, and Vite — featuring a full checkout flow (3-step shipping/payment/review), cart with persistence, auth, order history, and product search; deployed via GitHub Pages + GitHub Actions.
- Extended the platform with a React Native + Expo mobile app (iOS & Android) featuring bottom tab navigation, product browsing, cart with badge counter, and a full checkout flow — demonstrating cross-platform development ownership.

BlossomAI – Personalized AI Companion | github.com/briannab1997/bb-blossom-ai

- Engineered an AI-powered web application using JavaScript, Node.js, REST APIs, and OpenAI API with dynamic, context-aware conversational responses.
- Designed full frontend UX with responsive layouts; deployed via GitHub Pages. Demonstrates end-to-end product development ownership.

Travel Explorer – API-Driven Dashboard | github.com/briannab1997/BBtravel-explorer

- Built a dynamic dashboard integrating multiple third-party APIs for real-time travel data aggregation and display.
- Implemented async data fetching, error handling, and responsive UI using vanilla JavaScript — no framework dependencies.

Luminary – AI Study App |https://github.com/briannab1997/bb-study-app

- Built a full-stack study application enabling interactive learning workflows and intelligent study assistance.
- Implemented responsive frontend and backend logic to support dynamic study sessions and user-friendly learning tools.

TaskFlow (Bloom) – Native Android Task Manager | github.com/briannab1997/TaskFlow-Android

- Built a native Android task management app in Kotlin using MVVM architecture, Room (SQLite) database, Kotlin Coroutines, and Material Design 3 — featuring priority levels, swipe-to-delete with undo, and full data persistence across sessions.
- Implemented clean architecture with a Repository pattern, ViewModel + LiveData for reactive UI state, and RecyclerView with DiffUtil for efficient list rendering — patterns aligned with Google's Android best practices.

PROFESSIONAL EXPERIENCE

Software Engineering Intern | Mar 2026 – Present
Kentish Publishing Company (Remote)
Assist in building and testing AI-driven publishing and content automation tools using modern web technologies and LLM-powered workflows.
Support development of backend functionality and system integrations while collaborating with engineering and product teams.
Debug application behavior, analyze system outputs, and improve reliability and performance of AI-based tools.
Contribute to prompt engineering, data processing pipelines, and documentation for evolving AI workflows.

Participate in agile collaboration, testing features and iterating on solutions through hands-on development.

Certified Pharmacy Technician *Dec 2025 – Present*
CenterWell Pharmacy

- Support high-volume pharmacy operations within enterprise platforms; maintain strict data accuracy, compliance, and documentation integrity across regulated workflows.
- Bridge pharmacy operations and IT support teams — documenting system defects, reproducing bugs, and escalating issues with detailed technical context.
- Identify process inefficiencies and propose workflow improvements, demonstrating systems-thinking and analytical problem-solving.

Senior Pharmacy Care Coordinator *Feb 2024 – Dec 2025*
Centene

- Coordinated high-complexity authorization workflows across multiple regulated enterprise systems serving large patient populations.
- Produced detailed system documentation and collaborated cross-functionally to resolve process bottlenecks and workflow inefficiencies.
- Served as subject-matter expert for internal platform behavior; advised on root cause analysis and technical escalation paths.

Pharmacy Care Coordinator *May 2019 – Feb 2024*
OptumRx

- Investigated and resolved issues within internal pharmacy applications: data inconsistencies, permission access failures, and system integration breakdowns.
- Diagnosed application errors and incorrect user inputs; documented and triaged defects for technical teams in a manner consistent with QA best practices.
- Maintained high accuracy across concurrent complex workflows in a fast-paced enterprise environment.

Certified Pharmacy Technician (Contract) *Oct 2018 – Apr 2019*
Aetna

- Troubleshot internal pharmacy platforms, resolving data discrepancies, access issues, and workflow interruptions.
- Documented defects and supported end users by diagnosing application errors and coordinating resolution with technical teams.

E D U C A T I O N

B.S. Software Engineering *Expected April 2026*
Western Governors University

A.S. Health Sciences – Pharmacy Technician *2017*
Ultimate Medical Academy
